Projects

Handwriting Recognition System

- Converting handwritten text into digital format, enhancing accessibility for audiobooks and presentations.
- Specialized in Handwriting Recognition (HWR) and Handwritten Text Recognition (HTR), employing Deep Learning techniques like Convolutional Neural Networks (CNN), Recursive Neural Networks (RNN), and Connectionist Temporal Classification (CTC).
- Applied these methods to handwriting recognition using the IAM dataset for model training and testing, assessing performance with 'recognition rate' and 'character error rate'.

Blood Donation Management System

- Designed and developed a dynamic Blood Donation System using HTML, CSS, and PHP.
- The system allows donors to register, view donation centers, and schedule appointments. Recipients can request blood donations online.
- Implemented a user-friendly interface with secure data management. This project demonstrates proficiency in web development and database integration.

Company Managment System [↗](#)

- Designed and developed a Company Management System using HTML, CSS, and JavaScript for the frontend, coupled with an Oracle database and Tomcat server for the backend.
- This system enables efficient company operations, encompassing functions like employee management, salary, work timesheet and leaves.
- This project showcases my proficiency in web development and database management, underscoring my ability to create robust and user-friendly business solutions.
